2021-22 SCHOOL YEAR NOTIFICATION

As required by federal legislation (Asbestos Hazard Emergency Response Act - AHERA), every primary and secondary school in the nation is required to complete a stringent new inspection for asbestos and to develop a plan of management for all asbestos-containing building materials. St. Michael Catholic School's goal is to be in full compliance with this law and is following the spirit, as well as the letter, of the law. As a matter of policy, St. Michael Catholic School shall continue to maintain a safe and healthful environment for our community's youth and employees.

In keeping with this legislation, EPA accredited inspectors inspected St. Michael Catholic School and samples were analyzed by an independent laboratory. Based on the inspection, the school prepared, and the state approved, a comprehensive management plan for handling the asbestos located within its buildings safely and responsibly.

Furthermore, St. Michael Catholic School complies with the 3-Year Re-inspection requirement. St. Michael Catholic School buildings, where asbestos-containing materials were found, are under repair, and removal per the Operations and Maintenance Program.

This past year, St. Michael Catholic School conducted the following with respect to its asbestos containing building materials:

- Continuation of the Operations and Maintenance Program.

Federal law requires a periodic walk-through (called "surveillance") every six months of each area containing asbestos. Also, the law requires that all buildings to be re-inspected three years after a management plan is in effect. MacNeil Environmental, Inc will accomplish this under contract.

Short-term workers (outside contractors - i.e., telephone repair workers, electricians and exterminators) must be provided information regarding the location of asbestos in which they may come into contact. All short-term workers shall contact the lead maintenance person before commencing work to be given this information.

St. Michael Catholic School has a list of the location(s), type(s) of asbestos-containing materials found in the school building with a description and timetable for their proper management. A copy of the Asbestos Management Plan is available for review in the Parish Office. Copies are available at 25 cents per page. Questions related to the plan should be directed to MacNeil Environmental, Inc., Burnsville, Minnesota, at 952-890-3452
